

CROGRADE

Technical Specifications:

APPEARANCE	Brown Liquid
pH	6.0 -7.0
ACTIVE INGREDIENT	A proprietary formulation developed with extracts of <i>Bacillus velezensis</i> and <i>Priestia megaterium</i> .
AROMA	Mid unpleasant odour
SHELF LIFE	3 years
STORAGE	Under normal conditions

CROGRADE is an efficient metabolites based biological product derived from two bacillus sp specially targeting whiteflies in Vegetables, Fruits, Ornamental and field crops. The beauty of this products is, it residue free and acts on contact mode of action. It manages whitefly population efficiently at field level, and it also reduces further pest resurgence.

Mode of action: The group of metabolites would target multiple binding sites causing degeneration of the insect cuticle that comes in contact with **Crograde** and eventually insect dies. The internal structure of the insect destroys causing morbidity within 36 -72 hours. Reduced feeding and immobility are rapidly evident.

Recommended for:

CROGRADE affects the insect pests in the nymphal and adult whiteflies of ***Bemisia tabaci***, ***Trialeurodes*** sps.

CROGRADE^{*}

ORGANIC PESTICIDE for
Whitefly & Nymph Control

In technology partnership with **cropthetics UK**

*Patent Applied

Direction of use:

- ☑ For best results, use the product in the early stages of infestation.
- ☑ Highest performance when it sprayed with Nuron (OMRI certified Organic Spreader)
- ☑ Further need based sprays may taken depending on the severity pest (2 to 3 sprays at week intervals).
- ☑ Avoid rainy days, for better results spray either in the early morning or- in the evening hours.

Dosage: 3-5 ml/l of water. For knock-down effect, mix with Bifenthrin 10 EC with suggested dose.
