

# ENROOT

PLANT GROWTH REGULATOR

## ENROOT is recommended on :

Cotton, Soyabean, Potato, Tomato, Onion, Garlic, Safed Musali, Opium, Chilli, Sugarcane, Grape, Wheat, Groundnut etc.

## ENROOT improves crop yield by :

- Providing required micro-nutrients to the soil.
- Accelerates germination rates and enhances seedling emergence and uniformity.
- Increases root and shoot growth.
- Enhances uptake of soil minerals and organic matter
- Enhances nutrient absorption and translocation.
- Influences enzyme systems.
- Helps in better flowering and fruit set.
- Enables higher yield and quality produce.

## Method of Application :

ENROOT should be applied at 5Kg for one acre. This should be uniformly broadcasted all over the field.
