

MAXWELL is a highly concentrated, water soluble emulsion containing Potassium, Magnesium, Nitrogen and Sulphur.

Benefits of MAXWELL

- Stimulates strong root growth and beneficial soil micro-organisms.
- Promotes vigorous flowering & fruiting and overall crop health.
- Helps plants cope with all kinds of stress, such as heat, drought, and frost.
- Safe to use on all plants at any time.
- Improves seed germination rates and reduces transplant shock.
- It helps in increase in sugar content, flavour & store quality.
- Helps to provide lush green appearance to plants.
- The organic matter is also full of carbohydrates, which plants uses a building block.
- Increase in the size and weight of the grains/fruits. Higher yield and better quality of the produce.

Contents of MAXWELL

	wt/ vol	wt/ wt
Nitrogen (N)	3.00%	2.00%
Potassium (K ₂ O)	41.00%	26.4%
MagnesiumOxide (MgO)	2.5%	1.6%
Sulphur (S)	7.3%	4.8%
Chloride Less than	1.00%	0.65%
pH (10% of the solution) : 5 - 6		
Specific gravity : 1.52 - 1.56 g/ml @ 18° C		

MAXWELL

SUSPENSION MICRONUTRIENTS

In technology partnership with **cropthetics UK**

Dosage

350-500ml per acre, 2 - 2.5ml per liter of water.

Method of Application

The spray tank should be filled with half of the required amount of water. Measure the required amount of **MAXWELL** and add to the tank whilst maintaining constant agitation. Add remaining water to correct dilution spray. Shake well before using.

Storage and Compatibility

Store in cool and dry place, away from children reach.

MAXWELL is compatible with most but not all the pesticides, Micronutrients and Growth regulators.
